**HOTSPOT**Your company develops a web service that is deployed to at, Azure virtual machine named VM1 the web service allows an API to access real- time data from VM1 The current virtual machine deployment is shown in the Deployment exhibit. (Click the Deployment tab). The chief technology officer (CTO) sends you the following email message: "Our developers have deployed the web service to a virtual machine named WL Testing has shown that the API i accessible from VM1 and VM? Our partners must be able to connect to the API over the Internet Partners will me this data in applications that they develop:You deploy an Azure API Management service. The relevant API Management configuration is shown m the API ambit. Click the API tab). For each of the following statements, select. Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer: **New Question** You plan to deploy an API by using Azure API Management.You need to recommend a solution to protect the API from a distribute derail of service (DDoS) attack.What should you recommend/A. Create network security groups (NSG)B. Enable rate limitingC. Strip the Power-By response headerD. Enable quotas.**Answer: A** **New Question** You plan to deploy 200 Microsoft SQL Server databases to Azure by using SQL Database and Azure SQL Database Managed Instance.You need to recommend a monitoring solution that provides a consistent monitoring approach for all deployments The solution must meet the following requirements: Support current-state analysis on metrics collected near -real-time multiple times per minutes and maintained for up to one hour.Support longer term analysis based on metrics collected multiple timer per hour and maintained for up two weeks.Support monitoring of the number of concurrent logins and concurrent sessions. What should you include in the recommendation?A. Azure MonitorB. dynamic management viewsC. SQL Server-ProfilerD. trace flags**Answer: D** **New**

**Question** **HOTSPOT**You configure the Diagnostics settings for an Azure SQL database as shown in the following exhibit.Use the drop-down menus to select the answer choice that completes each statement based on The information presented in the graphic.

NOTE: Each coned selection is worth one point. Answer: **New Question** You have an Azure Contoso DB account named Account1 that has one write region and four read regions.You need to recommend a solution to ensure that, by default, any reads containers in Account1 will never see out writes. The solution must minimize costs.What should you recommend?A. Configure Account1 to use the Strong consistency level.B. Create all the containers m Account1 as fixed.C. Create all the containers m Account1 as unlimited.D. Configure Account 1 to use the Consistent Prefix consistency level**Answer: A** **New Question**

**HOTSPOT**You plan to deploy logical Azure SQL Database servers to The East US Azure region and the Wen US Azure region. Each server will contain 20 database accessed by a different user who reads in a different on premises location. The databases will be configured to use active geo-replication.You need to recommend a solution that meets the following requirement!;? Restricts user access to each database? Restricts network access to each database based on each user's respective location? Ensures that the databases remain accessible from down applications if the local Azure region fails What should you include in the recommendation? To answer, select the appropriate options m the answer areaNOTE: Each correct selection is worth one point.

Answer: **New Question** You use Azure virtual machines to run a custom application that uses an Azure SQL database on the back end.The IT apartment at your company recently enabled forced tunneling,Since the configuration change, developers have noticed degraded performance when they access the databaseYou need to recommend a solution to minimize latency when accessing the database. The solution must minimize costsWhat should you include in the recommendation?A. Azure SQL Database Managed instanceB. Azure virtual machines that run Microsoft SQL Server serversC. Always On availability groupsD. virtual network service endpoint**Answer: D** **New Question**

You have 100 Microsoft SQL Server Integration Services (SSIS) packages that are configuted to use 10 on-premrees SQ1 Server databases as their destinations.You plan to migrate the 10 on-premises databases to Azure SQL Database. You need to recommend a solution to host the SSIS packages in Azure.The solution must ensure that the packages can target the SQL Database instances as the\* destinations.What should you include m the recommendation?A. Azure Data CatalogB. SQL Server Migration Assistant (SSMS)C. Data Migration AssistantD. Azure Data Factory**Answer: A**

**New Question** You need to recommend a solution lo generate a monthly report of all the new Azure Resource Manager resource deployment in your subscription What should you include in the recommend3tton,A. Azure Activity LogB. Azure Monitor action groupsC. Azure AdvisorD. Azure Monitor metrics**Answer: B** **New Question** You have 100 Standard F2vs-v2 Azure virtual machines. Each virtual machine has two network adapter.You need to increase the network performance of

the workloads running on the virtual machine. The solution must meet the following requirements. \*The CPU-to-memory ratio must remain the same. \*The solution must minimize costs. What should you do? A. Enable SRIOV. B. Enable ROMA over InfiniBand. C. Install an additional network adapter. D. Configure NIC teaming. **Answer: A**

**New Question** Your company has several Azure subscriptions that are part of a Microsoft Enterprise Agreement. The company's compliance team creates automatic alerts by using Azure Monitor. You need to recommend a solution to apply the alerts automatically when new subscriptions are added to the Enterprise agreement. What should you include in the recommendation? A. Azure Policy. B. Azure Resource Manager templates. C. Azure Log Analytics alerts. D. Azure Monitor action groups. E. Azure Automation runbooks. **Answer: D!!!RECOMMEND!!!**
