QUESTION 131You need to ensure that users can create new public folders when EX4 is unavailable.What should you do? A. Run the New-PublicFolderMoveRequest cmdlet.B.   Add EX4 to DAG1.C.   Create a new public folder database.D.   Run the New-MoveRequest cmdlet. Answer: BExplanation:The Public Folder hierarchy is homed on DB3. DB3 is mounted on EX4. Currently EX4 is not part of a DAG.http://technet.microsoft.com/en-us/library/jj150538(v=exchg.150).aspxExchange 2013 public folders are built on mailbox infrastructure and use the same mechanisms for availability and redundancy. Every public folder mailbox can have multiple redundant copies with automatic failover, just like regular mailboxes. http://technet.microsoft.com/en-us/library/dd638137(v=exchg.150).aspx QUESTION 132You have an Exchange Server 2013 organization that contains mailboxes for multiple companies.You need to segment the address lists in the organization per company. What should you assign to the users of each company? A.   Address book policies (ABPs)B.   Address listsC.   Global Address Lists (GALs)D.   Email address policies Answer: AExplanation:Technically, answers A and C are correct as users are "assigned" ABPs and GALs during the process of GAL segmentation.I have chosen A as the answer however, as the overall process falls under the heading of "Address Book Policies"http://technet.microsoft.com/en-us/library/hh529948(v=exchg.150).aspxAddress Book PoliciesGlobal address list (GAL) segmentation (also known as GAL segregation) is the process whereby administrators can segment users into specific populations to provide customized views of their organization's GAL. Address book policies (ABPs) allow you to segment users into specific groups to provide customized views of your organization's global address list (GAL). When creating an ABP, you assign a GAL, an offline address book (OAB), a room list, and one or more address lists to the policy. You can then assign the ABP to mailbox users, providing them with access to a customized GAL in Outlook and Outlook Web App. The goal is to provide a simpler mechanism to accomplish GAL segmentation for on-premises organizations that require multiple GALs.
